

Someone is attacking you online

The order of steps matters. This list works in most of the cases we handle.

1 Secure the evidence

Screenshots showing the address, the date and the account name.

2 Limit contact

Blocking and muting cut the contact without starting a conversation.

3 Report the content

In the service where it appeared, with a short explanation.

4 Consider the police

Threats, blackmail, published personal data, intimate images without consent.

5 Ask for support

Our foundation helps with removing content and with reporting.

Report the content only after you have secured the evidence. Once removed, it is hard to prove what it said.
